Big Five personality test report

The Big Five Personality Test offers a concise measure of the five major factors of personality, as well as the six facets that define each factor. Factor scores give a broad global description of an individual. Facet scores describe, in more detail, the specific traits of personality that make up the broad global description.

Understanding the scores

This report ranks your scores within a range from 'very low' to 'very high'. To enable you to make a comparison the percentage of people* who normally fall within each range is indicated.

**Normal adult working population. Please note that distribution of scores may differ if comparisons are being made against other cultural, demographic or specific occupational groups.*

Approximate distribution for normal adult working population:

Ranges	Very Low	Low	Middle	High	Very High
Cumulative percentile	< 7%	7% > 30%	30% > 70%	70% > 93%	> 93%
